

# Book22: Gypsies and Magicians

## Assembly Instruction

### 1:12 Dollhouse Scale

#### Requirements:

- X-acto knife and fresh blade. Projects can be cut with scissors if you prefer.
- A thin metal straightedge ruler can be used to make fold lines by pressing against edge of the ruler.
- Tweezers are good for holding and pressing glue bonds.
- A cotton swab is also a useful tool for pressing glue bonds.
- Use a good cutting mat. Cardboard used as a substitute cutting mat will ruin your blade and your project will have rough edges.
- The best glue to use is a fast-grab, quick-dry, white craft glue that dries clear. Regular craft glue is too soupy to be of help here.
- An acid-free glue stick comes in handy, but only use when specified.
- A small piece of aluminum foil makes a good disposable glue pot.
- A slender artist's paintbrush is a good tool to use to apply glue. Wash the brush in clear water when not in use.
- Small piece of 2" by 1/16" thick balsa wood
- Optional 1/8" hole punch
- Black seed beads for planchette feet
- Small piece of acetate for box window. You can use a food package for this.

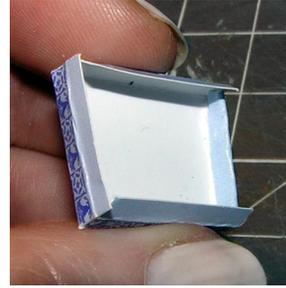

#### Tarot Deck

Photos may show a different project, however, the assembly is identical.

1. It is important to read how to make the cards. Cut carefully around the entire two panels of cards and backs. So your faces cards are attached to the back artwork.
2. Fold the two panels, blank sides together. Glue with glue stick. Now you may cut the cards apart.
3. Cut and fold pieces as shown.

4. glue the corner tabs of the lid with quick-grab glue and hold with tweezers until bonded.

5. Glue the corner tabs of the box bottom.
6. Fold down the box lining panels, then glue into place.

7. Use tweezers to obtain a tight slender seam.

8. Take the card divider and paint glue to the back.

9. Pinch the separator, then glue the piece to the inside box bottom.

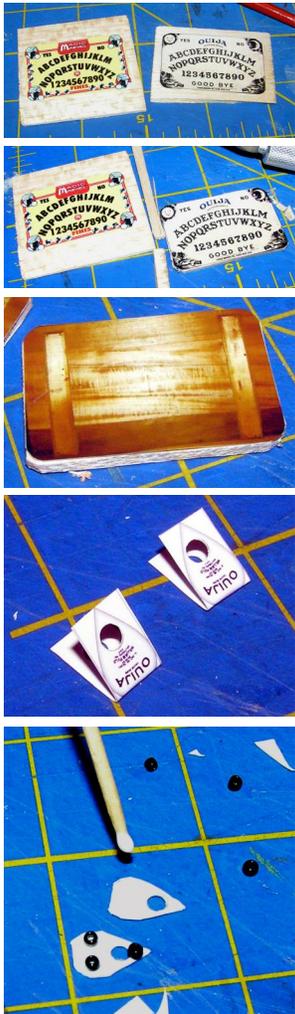

10. Place cards in box.

#### ESP Flash Cards

1. Cut but do not separate fronts from backs.
2. Use glue stick to glue blank sides together.

#### Magician Books

1. Cut copy paper into pages using the patterns. Glue inside the book covers.

### Ouija Board Assembly

1. Glue face of the Ouija board onto the 1/16" thick balsa wood.
2. Use a blade tool and cut carefully around the perimeter of the artwork.
3. Cut out back paper panel and glue to balsa piece.
4. Fold planchette as shown. You may use a 1/8" hole punch before or after gluing blank sides together.
5. Glue seed beads to back of planchette as feet.

### Magician's Box Assembly

1. Make box bottom and place faux artwork inside box.
2. Measure the acetate to fit in window of box top. Glue in place.
3. Make box top.

### Books with title page and blank pages

1. Cut and fold as indicated.
2. Glue title pages and blank pages back-to-back with a glue stick. LEAVE END BOARDS UNGLUED!
3. Slip bundle into book covers to see if fit is OK, trim if needed.
4. Use glue stick to glue in end boards to the front and back of cover.

The pages below are for anyone who may need them.
