

bookvts11 ~ Parlor Games and Paper Dolls (1" dollhouse scale 1:12)

Required tools and supplies:

- X-acto knife and fresh blade
- A thin metal straight-edge ruler. Make fold lines by pressing against edge of the ruler.
- Tweezers, detailing scissors
- Good cutting mat
- Fast-grab, quick-dry white craft glue that dries clear
- Small piece of aluminum foil to use as a glue pot
- Slender artist's paint brush to apply glue
- Optional: Paper Effects clear dimensional paint for dominos and checkers pieces
- Optional: 1/8" paper punch for checkers pieces
- Optional: Thick squeeze paint for fabric to make Parcheesi game pieces
- Optional: Scotch 1/2" wide double-sided tape
- Optional: Self-dry modeling clay for filling game dice

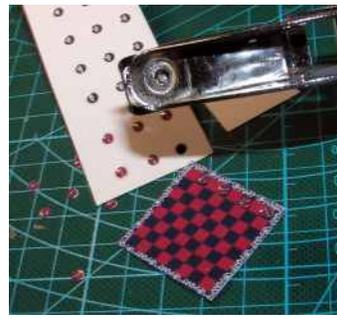

Products in tutorial may look different from yours, but constructed identically to yours. You can print these tutorial pages. However, leaving the tutorial on your screen allows you to zoom in closely on the photos.

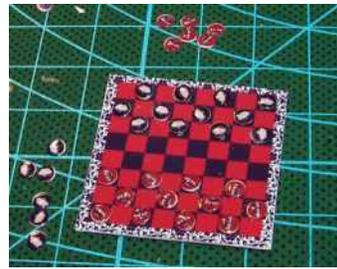

1. Apply clear Paper Effects or other dimensional paint to checkers pieces. Set aside to let dry thoroughly. It is alright to go outside the checkers' boundaries.

2. Cut game boards and fold in half. Use the back of finger nail to burnish folds. Then glue back to front. Repeatedly smooth and turn over boards to make sure they dry flat.

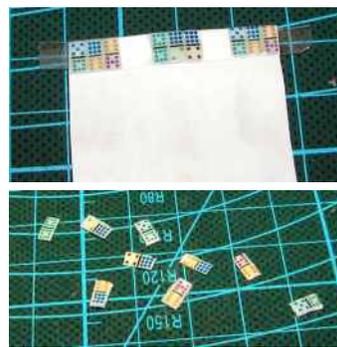

3. Use the 1/8" paper punch to cut checkers pieces. Remove the paper punch's catch so you can see what you are punching.

4. Here is a photo of the placement of checkers pieces. Used here to glue down pieces is Paper Effects.

5. Take the dominos faux box bottom and streak with Paper Effects to give faux dominos some realistic dimension. Also Paper Effect the dominos included in the kit you will be cutting into little dominos. Let dry completely.

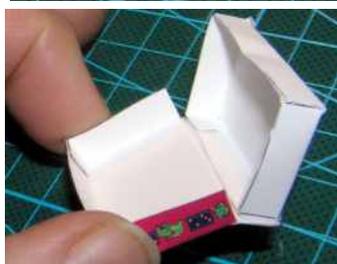

6. This photos shows the dry dominos. The first set has been folded back-to-back. What you see here is the back of the dominos with one line folded and glued. Used here was the 2-sided tape instead of glue. Cut this set from rest of dominos.
7. Snip dominos apart.

8. Cut and glue corner tabs of domino box bottom. Used here--instead of glue--is 2-sided tape.

9. Adhere two corner tabs found on domino box top. Position box top and bottom as shown here.

10. Glue box top's long panel to back of box bottom. Two-sided tape can be substituted for glue.

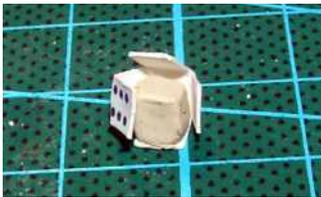

11. Place faux domino box interior with 4-side panels folded downward.

12. Put cut 2-sided dominos in box.

13. Cut and fold dice piece as shown. Then take a small amount of self-dry clay and place in center cross-point of paper piece.

14. Push paper against clay. Remove or add clay as needed. Once you have arrived at the right size and shape, set clay aside to dry. Once dry, paint glue on inside of paper dice, press sides against clay cube, hold until it sticks to its shape.

15. Cut four panels of playing cards. Fold each down the center lengthwise. Then glue blank sides together.

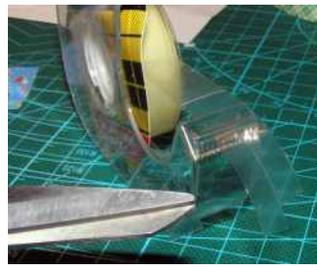

16. Make box top and bottom. Cut thoroughly dried card apart. Snip card corners if you are able to (too small for me). All 52 cards will not fit in box.

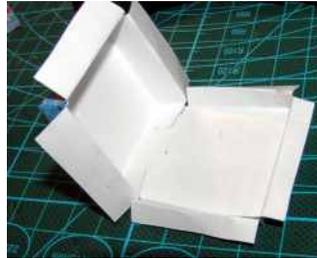

17. Use a piece of aluminum foil to practice making Parcheesi pieces. Take thick fabric paint and squeeze paint on foil in shape of chocolate drop. It takes some practice and the thicker the paint the better. Let dry, peel from foil and glue to Parcheesi board.

18. Glue the semi-gloss art panel onto the Parlor Games and Paper Dolls storage box before building the box.

19. Two-sided Scotch tape was used to make this box, but glue works just as well.

20. Adhere corner tabs. Fold and splay outward the lining panels as shown.

21. Adhere lining panels to the interior of the box.

22. Adhere the box interior panel to bottom as shown.

23. Adhere the longer panel to the interior of the lid and box back.

24. To fill the box: 1) paper doll panels, 2) game boards, 3) domino box in back, 4) playing cards box in front, 5) dice next to cards box, 6) fill empty spaces with leftover cards and checkers.

bookvts11 ~ Boxed and Faux Tube Dolls (1" dollhouse scale 1:12)

Required tools and supplies:

- X-acto knife and fresh blade
- A thin metal straight-edge ruler. Make fold lines by pressing against edge of the ruler.
- Tweezers, detailing scissors
- Good cutting mat
- Fast-grab, quick-dry white craft glue that dries clear
- An acid-free glue stick
- Small piece of aluminum foil to use as a glue pot
- Slender artist's paint brush to apply glue

Products in tutorial may look different from yours, but constructed identically to yours. You can print these tutorial pages. However, leaving the tutorial on your screen allows you to zoom in closely on the photos.

Shirley Temple Boxed Doll

1. Cut out box window first! Next cut out three pieces and fold as shown in photo.

2. Glue corner tabs. Press with tweezers. Cut acetate window and glue into place. Allow to dry.

3. Place doll insert into box and close box

The Fifth Avenue Doll

1. Follow the steps used for Shirley Temple doll for this doll.

Minnehaha Dolls

1. Follow the steps used for Shirley Temple doll for this doll.

Palmer Cox Brownies Nine-Pins

1. Follow the steps used for Shirley Temple doll (without window).

2. Cut all figures and bend stand upright.

3. Put glue on back of figures. Do not glue red stands.

4. Glue pairs together. Make sure they are flat while they dry. Splay stand.

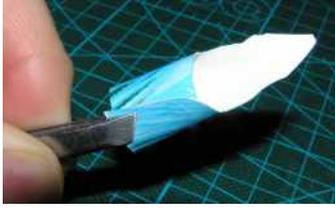

5. Stand up in order for Nine-Pins. Use a large bead for the bowling ball.

Tube International Dolls

1. Cut out figures.
2. Roll tube doll around something like a pen.

3. Glue skirts closed.

4. Bend feet upward.

Doll Boxes

1. Cut the doll box window before you make the box.
2. Glue acetate panel against window with just a tiny bit of craft fast-grab glue. Make sure to trim acetate beforehand if necessary.
3. Make the box. Use the straight-edge ruler to crease folds perfectly. Create box shape with folds.
4. Glue corner tabs to inside of box top and bottom. Use tweezers to press a good bond at each tab.
5. Fold sides downward on doll insert and place inside box bottom.

Tube 1940s Girl Dolls

1. Follow the same steps for the 1940s girl dolls.
